

With regular care and regular road conditions, Status offers a two year finish warranty on its wheels with chrome and painted finishes. Status provides a five year structural warranty for wheels it manufactures that are structurally unsound because of a manufacturing defect caused by Status that makes the wheel unfit for its ordinary purpose. Damage or issues with wheels manufactured by Status that are not caused by, or the result of, a manufacturing defect by Status are not covered under the warranty. Additionally, the following are expressly excluded from the warranty:

- Status does not offer a "road hazard warranty," so any damage or issue with a wheel caused by the wheel colliding with a pothole or any other object or debris will not be covered by the warranty;
- Wheels that have been used in racing are not covered by the warranty regardless of the damage or structural unsoundness; and
- Wheels mounted on vehicles with a load rating in excess of the load rating of the wheel are not covered by the warranty regardless of the damage or structural unsoundness.
- Wheels that have been modified, repainted, or powder coated.

THE WARRANTY ONLY APPLIES TO THE ORIGINAL PURCHASER OF A WHEEL AND THE WARRANTY IS LIMITED TO THE ACTUAL AMOUNT STATUS WAS PAID FOR THE WHEEL.

To submit a wheel for determination of coverage, a distributor must first obtain a Returned Goods Authorization number from an authorized Status salesperson. Wheels sent to Status without first obtaining a Returned Goods Authorization number will be refused and returned to sender. After obtaining the Returned Good Authorization number, **THE DISTRIBUTOR WHO PURCHASED THE WHEEL FROM STATUS** must send the wheel by freight prepaid, as freight costs, shipping costs and any consequential damages are not covered by the warranty, to Status headquarters in Brea, California for inspection by Status. The invoice of the original purchase must be included with the wheel so Status can verify the wheel is being submitted for coverage under the warranty by the original purchaser. A

customer of a distributor cannot directly send a wheel for inspection to Status as Status does not communicate, correspond or deal in any way with the customers of Status's distributors. A wheel submitted to Status by a customer of the distributor will be returned.

After receiving a wheel submitted by a distributor for inspection, Status will inspect the wheel and notify the distributor if the wheel is covered by the warranty. If Status determines the wheel is covered by the warranty, Status will issue a credit note to the distributor for the amount the distributor paid Status for the wheel.
